PROFILE SUMMARY

Software Engineering graduate and Flutter Developer with hands-on experience building and shipping production mobile applications from the ground up to release, for both Android and iOS. Built and maintained apps at Ashafaq Company (Saudi Arabia), published on Google Play and the App Store, serving 15,000+ active users with 14,000+ completed operations. Skilled in Flutter, Dart, Bloc state management, and Clean Architecture, with practical experience integrating REST APIs and Firebase, managing local storage, and debugging production releases. Experienced deploying apps to Google Play and the App Store, and collaborating within distributed teams across Saudi Arabia, Germany, and Syria. Strong problem-solver with 80+ algorithmic challenges solved on Codeforces.

TECHNICAL SKILLS

- Mobile Development: Flutter, Dart, Flutter Widgets, Custom UI Development, Lottie Animations
- Architecture & State Management: Bloc, MVC, MVVM, Clean Architecture, Clean Code Principles
- Navigation & Dependency Injection: GoRouter, GetIt
- API Integration: REST APIs, HTTP Networking, JSON, integration with Laravel-based backend services
- Firebase: Cloud Firestore, Cloud Messaging (FCM)
- Local Storage: Hive, Sqflite, Shared Preferences
- Other Integrations: Stripe Payment Gateway, AI APIs (Image & Text Analysis)
- Version Control: Git, GitHub
- CI/CD & Deployment: Codemagic, Google Play Console, App Store Connect
- Platforms: Google Play Store, Apple App Store
- Languages: Arabic (Native), English (Upper Intermediate — B2)

WORK EXPERIENCE

Applications Developer — Ashafaq Car Wash App | [Ashafaq Company, Saudi Arabia](#) | 2025 – Present

- Built and maintained a production Flutter mobile application for the Saudi market, serving 15,000+ active users with 14,000+ completed operations in Riyadh.
- Designed and implemented the app's UI and state management using Flutter and Bloc.
- Integrated the app with REST APIs for real-time booking and order data, and published it on Google Play Store and Apple App Store, maintaining regular updates. (Available on: [Google Play](#) | [App Store](#))

Applications Developer — Ashafaq Worker App | [Ashafaq Company, Saudi Arabia](#) | July 2025 – August 2025

- Built the worker-facing Flutter application from scratch, supporting 4 languages: Arabic, English, Hindi, and Bengali.
- Implemented a 5-stage workflow UI (Accepted, Arrived, In Progress, Completed) for tracking service requests, integrated with REST APIs for real-time updates.
- Internal-use Flutter application deployed exclusively to company workers.

Applications Developer — Ashafaq Branch App | [Ashafaq Company, Saudi Arabia](#) | January 2026 – March 2026

- Developed a Flutter branch-management application used across 11 branches in Riyadh.
- Integrated the app with REST APIs so branch managers could receive and process customer requests seamlessly.

Applications Developer — Food Delivery App (Syrian Market) | [Client Project](#) | August 2025 – February 2026

- Collaborated with a distributed Syrian team to build a nationwide food delivery Flutter application, targeting all provinces in Syria.
- Transformed Figma designs into a fully functional, production-ready Flutter UI.
- Implemented Clean Architecture with Bloc state management for scalability and maintainability.
- Integrated GoRouter for navigation and GetIt for dependency injection to keep the codebase modular.

- Integrated the app with Cloud Firestore for real-time data updates.

Flutter Developer — ShamFix | Smart Home & Building Maintenance App | [Graduation-Project | 2025 – 2026](#)

 Watch Demo: [ShamFix-Scenario](#)

- Built ShamFix's Flutter app connecting clients and technicians through two role-based UI experiences and a complete maintenance-request workflow.
- Built a fully bilingual (Arabic/English) UI with remote version checking via Firebase and onboarding flows.
- Integrated AI APIs for automatic issue classification from photos or text descriptions, auto-filling request data based on the result.
- Implemented an 8-stage real-time order workflow with live status tracking inside the app.
- Integrated Stripe payment gateway alongside a wallet system, and delivered push notifications via Firebase Cloud Messaging (FCM).
- Integrated the app with REST APIs (Laravel-based backend services) for all data operations, and built a technician dashboard UI for earnings and order tracking.

Flutter Developer — Shifa | Hospital Operating Room Scheduling App | [Client Project | October 2024 – March 2025](#)

- Built the Flutter mobile app for Shifa, a hospital operating-room scheduling client project, with three role-based UI experiences (Admin, Coordinator, Surgeon) covering the full surgery workflow.
- Implemented Bloc state management (MVVM) and built role-based screens reflecting real-time scheduling and re-optimization updates.
- Integrated the app with REST APIs (Laravel-based backend services) for scheduling data, using Sanctum-based authentication on the client side.
- Handled UI development, navigation, and debugging throughout the mobile app's development cycle.

EDUCATION

Bachelor of Software Engineering — Yarmouk Private University

2021 – 2026 | *Graduated*

CERTIFICATIONS

- Flutter and Dart: Developing iOS, Android, and Mobile Apps — Coursera
- Advanced Flutter UI and State Management from Packt — Coursera
- English Level B1 Certificate — Blue Ocean Institute
- English Level B1+ Certificate — Blue Ocean Institute

KEY COMPETENCIES & SOFT SKILLS

- Strong problem-solving and analytical thinking (80+ algorithmic challenges solved on Codeforces).
- Cross-cultural communication and collaboration within distributed, remote teams (Saudi Arabia, Germany, and Syria).
- Adaptability, fast learning of new technologies, and effective time management across multiple parallel projects.
- Designing scalable, reusable UI components, translating Figma designs into production-ready apps, and building secure applications with authentication and encryption.
